

April 1, 2020

MSMS is currently one of only a few accredited organizations in Michigan that can provide CME credit for hours worked on COVID-19 cases. A survey is available to help you keep track of these hours. It is available at <https://www.surveymonkey.com/r/MSMSCOVID19>

Executive Order 2020-13 states that “effective immediately and continuing through April 14, 2020 at 11:59 pm, LARA may recognize hours worked responding to the COVID-19 emergency as hours toward continuing education courses or programs required for licensure.” As a MSMS member, physicians may choose to describe what they have learned from the COVID-19 emergency and submit to MSMS for CME credit. A physician can claim hours in which he or she are directly responding to the COVID-19 emergency. This would include: research, reading articles, listening to podcasts, discussing plans, and direct clinical care of COVID-19 patients.
