Highlights:

- Changes for Prolonged Services
- New COVID-related Codes & Guidelines
- Working with multiple E/M Section Guidelines

Instructor

Jan Hailey
CMC, CMIS, CMOM, CMCO

CPT® 2021 updates include: 329 changes
206 additions, 54 deletions, and 69 revisions.

The most impactful changes in 25 years are to the E/M section; specifically, for the office/outpatient visits. The new guidelines require that a medically appropriate history and physical examination be performed and documented for this code range only. Learn how these changes will impact your specialty.

Changes for the Prolonged Services section of codes will be explained, including a new table: "Comparison of Prolonged Services" and new code 99417.

Six new codes have been added to report online digital evaluation services (e-visits). These codes for patient-initiated digital communication appear in both the E/M section and Medicine section.

Two new codes will report self-measured blood pressure monitoring. Additional changes include new codes for health and behavior assessment and intervention services.

Course materials will be provided for use beyond the classroom. A CPT code set manual is not required to attend this course but will be helpful to understand the context of the recent code changes.

3-hour session will include Q&A and breaks

3 CEU | 9 am - 12 pm EST | Thursday, December 3, 2020
FEE: \$199 | **Free for HVPA Practices Use promo code HVPA21**
