Participate right from your computer or device

### Highlights:

- Reduction in conversion factor
- Payment for office/outpatient E/M & Analogous
- Coverage for opioid use disorder treatment

**3-hour session will include  
Q&A and breaks**

Proposed rules for 2021 have been announced by CMS and every specialty that bills Medicare will feel the squeeze in 2021.

**One of the most impactful proposals on the table is a reduction in the conversion factor down \$3.83 from \$36.09 in 2020.**

There are several proposals regarding the professional scope of practice and related issues such as supervision of diagnostic tests by certain NPPs, pharmacists providing services incident to the physician services, medical record documentation for physician and NPPs, and more.

Proposed cuts to 2021 Medicare payments for the following surgical procedures include: cardiac, thoracic, vascular, general, neuro, and ophthalmology.

Other proposals include screening for substance abuse disorders during initial preventive physical exam and annual wellness visits, electronic prescribing of schedule 2-5 controlled substance under Medicare Part D, removal of outdated NCDs, and two new HCPCS codes.

This intermediate-level course is best suited for those with knowledge of outpatient coding and reimbursement. Participants will receive a digital course manual with a summary of all the changes and resource links for use beyond the classroom.

**3 CEU | 9 am - 12 pm EST | Thursday, December 10, 2020**

**FEE: \$199 | Free for HVPA Practices Use promo code HVPA21**
